DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Damon J. Kruger (206) 876-6078 on June 9, 2010.

1. The application has been amended as follows:

In claim 1, line 1: "processor-readable storage medium" has been replaced with, --computer memory--.

In claim 2, line 1: "processor-readable medium" has been replaced with, --computer memory--.

In claim 3, line 1: "processor-readable medium" has been replaced with, --computer memory--.

In claim 7, line 1: "processor-readable medium" has been replaced with, --
computer memory--.

In claim 8, line 1: "processor-readable medium" has been replaced with, --
computer memory--.

In claim 9, line 1: "processor-readable medium" has been replaced with, --
computer memory--.

In claim 10, line 1: "processor-readable medium" has been replaced with, --
computer memory--.

In claim 11, line 1: "processor-readable medium" has been replaced with, --
computer memory--.

In claim 12, line 1: "processor-readable storage medium" has been replaced
with, --computer memory--.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Prior art of record fails to teach or suggest the process of inferring information
from "repeat instances of media objects", wherein an "object", which is best defined

by application 10/428812 (incorporated by reference), is defined as "any section of non-negligible duration, i.e. a song, video, advertisement, jingle, etc., which would be considered to be a logical unit by a human listener or viewer" (see [abstract]), wherein the inferring comprises comparing temporal lengths of repeat instances of the media object with one another to determine different versions of the media object. Thus the claimed invention when taken as a whole, specifically reciting "inferring the information from repeat instances of media objects occurring within one or more media streams; and... wherein the inferring comprises comparing temporal lengths of repeat instances of the media object with one another to determine different versions of the media object..." overcomes the prior art of record.

Conclusion
